## Description of Change to the Customer:

Intel is upgrading the firmware version on the Intel® SSD DC S3500 Series products from D2010355 to D2010370.

Intel is making a packaging change on Intel® SSD DC 3500 Series products as follows:

- a. Clam shell box: from E81045-001 & E71439-001 to H21430-001
- b. Screws: from E77026-001 & E77138-001 to H23617-001

E77026-001		H23617-001

### **Customer Impact of Change and Recommended Action:**

Since the firmware update has incremental improvement over the previous version, Intel anticipates no product impact with this firmware, and re-qualification is not recommended.

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

Milestone dates are estimates and subject to change based on business and operational conditions.
