Product Change Notification

Change Notification #: 105995 - 00
Change Title: A1435SCSIKIT, PCN 105995-00, Product Design, Class2: Flash Part of SCSI Hot-Swap Backplane is Being Replaced
Date of Publication: February 28, 2006

Key Characteristics of the Change:

Product Design

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Mar 17, 2006
---	--------------

Description of Change to the Customer:

The change is to replace the flash part of the SCSI HSBP with other flash part, since current flash part is End-Of-Life(EOL). The SCSI Hot-Swap Controller(HSC) firmware on the SCSI HSBP is updated to version 1.08 to support the new flash part. Only the Boot code of the SCSI HSC firmware is changed. The Operational code is still the same with the SCSI HSC firmware version 1.07. The PBA of the SCSI HSBP is rolled from C53570-404 to C53570-405.

Customer Impact of Change and Recommended Action:

The instructions for the customer to update the SCSI HSC firmware:

- If using the software utility "FWPIAUPD.exe" released with the SCSI HSC firmware to update the SCSI HSC firmware, any version of the SCSI HSC firmware can be updated on any PBA of the SCSI HSBP. Because only the Operational code can be updated by this utility. The Boot code can not be updated by this utility.
- If using other utilities or devices that can update both the Boot code and the Operational code(e.g. a flash programmer) to update the SCSI HSC firmware, the correct version of the SCSI HSC firmware must be taken for the particular PBA of the SCSI HSBP. For the SCSI HSBP with the PBA C53570-405 or later, the SCSI HSC firmware version 1.08 or later must be taken. For the SCSI HSBP with the PBA C53570-404 or earlier, the SCSI HSC firmware version 1.07 or earlier must be taken. Please also refer to the release notes of the SCSI HSC firmware. Intel anticipates no other customer impact for this change. Evaluate when available.
