Product Change Notification

Change Notification #: 104661 - 00
Change Title: SR1400JR2, FYI, Class 2 - Changes to Packaging, Deployment Toolkit CDROM, CDROM interposer
Date of Publication: December 17, 2004

Type of Change Notification:
FYI - (For Your Information)

Key Characteristics of the Change:
Product Material

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Jan 03, 2005
---	--------------

Description of Change to the Customer:

The following changes are being made to the product codes listed:

1) Packaging Design and Material Change:

The foam packaging inserts are both being redesigned and changing material. The material is changing from Expanded Poly Styrene (EPS) to Expanded Poly Ethylene (EPE) to reduce possible breakage when exposed to over abusive handling. As a result of these changes, the size of the outer box will increase.

2) CDROM Interposer Assembly Change:

A design change was made to the spacer, used between with CDROM drive and CDROM interposer card. The Interposer assembly number is changing from C74971-202 TO C74971-203. This design change was made to address an issue with the CDROM tray "Sticking" when ejected. With this design change, both screws can now be used to attach the interposer assembly to the cdrom drive. See Technical Advisory # 0739 for issue details.

3) Revised Intel Server Deployment Toolkit CDROM:

The Server Deployment Tool Kit CDROM has been updated. The CDROM part number is revving from C60166-002 to C60166-003.

Changes to the CDROM will include but is not limited to the following:

FRUSDR Update Utility 6.5.1
Platform Confidense Test 1.04
Updated On-board Device Drivers
Updated product documentation

Customer Impact of Change and Recommended Action:

Intel anticipates little customer impact with the listed product changes. Evaluate when available.

Products Affected / Intel Ordering Codes:
