After

**Customer Impact of Change and Recommended Action:**

This change has been thoroughly evaluated to ensure there is no quality, reliability, or functional implication to our customers. Intel is not recommending additional qualification of these changes on platforms received from Intel.

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

For your information only: no changes to form, fit, or function. No change to Intel ordering codes.

Milestone dates are estimates and subject to change based on business and operational conditions.
