## Forecasted Key Milestones:

<b>Date Customer Must be Ready to Receive Post-Conversion Material:</b>	Nov 04, 2016
-------------------------------------------------------------------------	--------------

## Description of Change to the Customer:

The Intel® NUC Kit SKUs listed in the products affected table below will have the following change.

1. The BIOS will be updated from RYBDWI35.86A.0358 to RYBDWI35.86A.0359. BIOS updates listed include the latest security enhancements and updated visual BIOS. A complete list of the BIOS changes can be found in the BIOS release notes. The BIOS updates and release notes can be found at <http://downloadcenter.intel.com>
2. Change Intel Iris Graphics Label

Current	New

## Customer Impact of Change and Recommended Action:

It is recommended that customers evaluate this new BIOS to ensure a smooth transition. This change has been thoroughly evaluated to ensure that there are no quality or reliability implications to our customers. Intel validation of a new board revision does not include testing with older versions of BIOS.

The label change to the products does not affect functionality. Intel anticipates no impact to customers.

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

Milestone dates are estimates and subject to change based on business and operational conditions.

Please contact your local Intel Field Sales Rep if you have any further questions about these changes.
