Product Change Notification

Change Notification #: 105317 - 00
Change Title: Intel NetStructure® ZT 5504 System Master Processor Board, PCN 105317-00, FYI, New firmware release and N-FET component change
Date of Publication: July 12, 2005

Type of Change Notification:

FYI - (For Your Information)

Key Characteristics of the Change:

Product Design

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Jul 31, 2005
---	--------------

Description of Change to the Customer:

A new firmware version 1.7 has been released for the Intel NetStructure® ZT 5504 System Master Processor Board to resolve a compatibility issue with newer generation Intel NetStructure® ZT 7102 Chassis Management Module (CMM) with 5.x firmware.

The CompactPCI (cPCI) and AdvancedTCA (ATCA) CMM firmware code merged and adopted the ATCA interrupt driven event methodology. The CMM now waits for the Single Board Computers (SBC) to actively communicate their events instead of utilizing a polling method for discovering SBC blade events.

The previous firmware version of the ZT 5504 did not use an interrupt driven event notification methodology, therefore it does not actively communicate its events to the CMM. The new firmware version 1.7 for the Intel NetStructure® ZT 5504 System Master Processor Board resolves this issue.

The Intel NetStructure® ZT 5504 System Master Processor Board will also implement a new N-FET component part number: A31529-002 to replace previous component part number: A31529-001 that has gone EOL by the manufacturer.

Customer Impact of Change and Recommended Action:

Customer must be ready to receive post-conversion change. Further customer validation is not required and Intel has completed Full Qualification on the changes.
