Description of Change to the Customer:

products as shown in the affected products table within this PCN notification will undergo the following change:

Intel Corporation is consolidating the assembly of its Intel PRO Network Adapters into one contract manufacturing site. Adapters are currently manufactured in two Intel qualified facilities, one in Penang, Malaysia and one in Suzhou, People's Republic of China.

Intel will transfer and consolidate its adapter products into the Intel qualified facility located in Penang, Malaysia. The Penang facility was qualified in 2001 to manufacture adapter products, and it currently manufactures adapters with equivalent product technology.

There will be no change to the product except the location it is manufactured, and the identification that the product is now "Made in Malaysia" vs. the older "Made in China".

Customer Impact of Change and Recommended Action:

- There will be no change to Form, Fit or Function, except reference to the manufacturing location as mentioned above.
- The implementation date for all changes, on each SKU, will occur via a staggered implementation approach.
- The Customer Ready to Receive dates, per SKU, are noted within the Forecasted Key Milestone table within this PCN notification.
- Customers should expect to receive mixed inventory on all products, until current inventory levels are depleted.
