Product Change Notification

Change Notification #: 107013 - 00
Change Title: TIGI2U, PCN 107013-00, Product Design, PCI Riser 5V Cable Tie Wrap Addition
Date of Publication: December 08, 2006

Key Characteristics of the Change:

Product Design

Forecasted Key Milestones:

Date of First Availability of Post-Conversion Material:	Jan 08, 2007
--	--------------

The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

The Intel Carrier Grade Server TIGI2U PCI Riser assembly incorporates an additional 5V power cable that routes power from the power supply to the riser allowing the total power capability of the Full Height riser to increase from 50W to 75W. In its current shipping status, this 5V cable is loosely installed and creates the potential for a pinched cable and shorting if a PCI adapter nicks the cable during installation.

To prevent this, a tie wrap is being added to hold down the power cable so that it cannot be pinched between the PCI connector and PCI adapter when inserting PCI adapter.

Customer Impact of Change and Recommended Action:

No anticipated impact to customers.
