# Product Change Notification

**Change Notification #:** 104798 - 00  
**Change Title:** SR2400, PCN 104798-00, FYI, FYI; Power Supply Power Label Rating Correction  
**Date of Publication:** February 03, 2005

**Type of Change Notification:**  
 FYI - (For Your Information)

**Key Characteristics of the Change:**  
 Product Material

## Forecasted Key Milestones:

|  |              |
|--|--------------|
| <b>Date of First Availability of Post-Conversion Material:</b> | Feb 11, 2005 |
|--|--------------|

*The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.*

## Description of Change to the Customer:

The 12V4 rail was originally certified to support 10 AMP. The rail needs to support 14 AMP. This was an oversight in the original release. There was no design change only a certification level change. This only affects the label on the power supply.

## Customer Impact of Change and Recommended Action:

Intel anticipates no customer impact for this change. Evaluate when available.
