Description of Change to the Customer:

Intel Corporation is announcing the timeline for End of Life status for Intel® Ethernet Controller XXV710-AM1, Single Port. The listed products in "affected table" below will be discontinued.

The recommended replacement for existing designs utilizing the Intel® Ethernet Controller XXV710-AM1 (Single Port), is the Intel® Ethernet Controller XXV710-AM2 (Dual Port), and the recommended replacement for new designs considering the Intel® Ethernet Controller XXV710-AM1 (Single Port), is the Intel® Ethernet Controller E810-XXVAM2 (Dual Port).

The products listed on the "Products Affected/Intel Ordering Codes" tables below will be discontinued and unavailable for additional orders after the "Last Product Discontinuance Order Date."

Effective on "Last Product Discontinuance Ship Date" Intel will stop shipping the products referenced below in the "Products Affected/Intel Ordering Codes" table.

Global demand increases, shortages of wafers from external manufacturing capacity, and industry wide substrate shortages have significantly impacted the supply of Intel® Ethernet controllers. This manufacturing capacity constraint has limited Intel's ability to meet the unprecedented demand of Ethernet controllers. Intel has accelerated End of Life plan for some controller products in order to consolidate and maintain supply for high-volume products.

See table below.

Customer Impact of Change and Recommended Action:

Intel Corporation will make commercially reasonable efforts to support last time order quantities.

However, customers are strongly encouraged to immediately qualify and expedite ramp to recommended replacement products, as noted in the Replacement products / Intel Ordering Codes table below.
