Product Change Notification

Change Notification #: 105104 - 00
Change Title: Optical Networking Division, LXT908 44LD PLCC Package, Product Marking and Manufacturing Site Change, Components, PCN 105104-00, FYI
Date of Publication: May 18, 2005

Type of Change Notification:
FYI - (For Your Information)

Key Characteristics of the Change:
Manufacturing Site
Product Marking

Forecasted Key Milestones:

Date of Qualification Data Availability:	Jun 10, 2005
Date Customer Must be Ready to Receive Post-Conversion Material:	Jul 18, 2005
Date of First Availability of Post-Conversion Material:	Jul 18, 2005

The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

In line with manufacturing site consolidation, Intel is transferring the 44 lead PLCC products assembled from STATS Singapore to Amkor Philippines. This will enable Intel to provide better support to customers in the dynamic market environment. Amkor is an equivalent assembly site. Product Mark will reflect the new assembly site. See below diagram for new mark.

Customer Impact of Change and Recommended Action:

No customer impact anticipated, as there will be no form, fit, or function changes to products.

Customers may receive product form either site until existing inventory is depleted.

There will be no change to the product order code.
