DESCRIPTION OF CHANGE:

As part of the post-acquisition activities of the Intel® DWDM products (part numbers TTX11x, TTX 199x, TXN13x, codename “Yellow Jacket”, “Grasshopper”, “Cricket” and “Monarch”), Emcore will be changing the product manufacturer markings from Intel to Emcore. No changes will be made to the product model numbers (MM), or part numbers. Logos will change on the product label, box label and test reports. In addition, Emcore will be adopting the industry standard “e0” RoHS marking rather than the Intel specific “L1” nomenclature. This marking change will be a “soft” transition, and customers should expect to receive a mix of Intel and Emcore labeled product while inventory of the Intel labeled product is purged. Please refer to the end of this document for examples of these logo and marking changes.

Product will continue to be manufactured at the existing contract manufacturers, using the same processes, personnel and equipment. In addition, as Intel is exiting this business area with the divestiture of the product line, Emcore will be retaining the current EEPROM manufacturer ID code to ensure compatibility with current customer equipment.

Customers should anticipate transitioning to placing new orders using Emcore’s order fulfillment system. This transition is currently targeted to begin in the late May timeframe. Details for this transition will be updated by Emcore as we approach the target date and will be forthcoming by way of dear customer letters with a minimum of 30 days notice to customers.
