Product Change Notification

Change Notification #: 108365 - 00
Change Title: D5400XS, PCN 108365-00, Product Material,
Cable change
Date of Publication: March 21, 2008

Key Characteristics of the Change:

Product Material

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Apr 07, 2008
---	--------------

Description of Change to the Customer:

This change is only to the contents of the packaging. There is no change to the AA of the product. The change replaces the SLI Flex Cable with an SLI PCB Rigid version.

Customer Impact of Change and Recommended Action:

This new rigid SLI connector will require the graphics cards to be placed in slots 1 and 3 only, whereas the flex cable allowed multiple configurations.

This change has been thoroughly evaluated to ensure that there are no quality or reliability implications to our customers. Intel is not recommending additional qualification of these changes on platforms received from Intel. This change is not expected to cause a change to the Microsoft* Windows* operating system's software driver stack. No expected OS image change.

This change is not to the board product. Because there is no effect to the board (just the accompanying materials), the AA number will not change

Products Affected / Intel Ordering Codes:
