Product Change Notification

Change Notification #: 113736-00
Change Title: Intel® Pentium® Processor G3240,
PCN 113736-00, Product Material,
New Product Code and Material Master Number
Date of Publication: April 6, 2015

Key Characteristics of the Change:

Product Material

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	April 6, 2015
---	---------------

The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

Intel issued a customer communications in January 2014, in conjunction with the Haswell Refresh sampling request, citing a potential need to ship a mix of product material for the Pentium G3220 and G3240 at some point in the future. To ensure a steady supply on these SKUs Intel is now planning to ship additional product material on these two SKUs.

A new product code and material master number (MM#) will be replacing the current Intel® Pentium® Processor G3240. Please see the affected products listed in the "Products Affected/Intel Ordering Codes" table below.

Customer Impact of Change and Recommended Action:

Intel anticipates no change or impact to customer platforms designed to Intel guidelines. There are no functional, performance, or electrical differences between the currently shipping parts products and planned new material numbers.

Customers should be ready to receive the new material by the "Date Customer Must be Ready to Receive New Material" as shown above in the milestones above.

Please contact your Intel Field Sales Representative to order samples and/or with any questions or concerns.
