Date of Publication: November 10, 2020

Key Characteristics of the Change:

Product Design, Order Code

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material: *	November 28, 2020
---	-------------------

* Intel appreciates the customer's desire to receive the latest revision of products. However, Intel manages inventory on a first in first out (FIFO) basis at the MM# level. Subsequently, customer requests for a specific revision of material (below the MM#) will not be supported by Intel.

Description of Change to the Customer:

Intel is removing two Electromagnetic Interference (EMI) capacitors from Intel® Server 1600W AC Common Redundant Power Supply "AXX1600TCRPS". This change has no impact to regulatory certifications or product reliability. If necessary, contact your Intel support representative for additional information on this change.

Technical details can be referred on the Technical Advisory-1160. The change requires the assignment of a new Material Master (MM#). Please refer to the new Material Master (MM#) and Top Assembly (TA#) numbers as shown in the Products Affected table in this document.

Customer Impact of Change and Recommended Action:

Intel does not expect any other impact to customers from these changes but encourages customers to understand the change and determine the impact on their applications. For that reason, Intel recommends that the customer perform a standard level of evaluation. Customers can download and evaluate the latest BIOS/ME/Integrated BMC and FRUSDR release notes for more information at <http://www.intel.com/support>.
