Product Change Notification

Change Notification #: 104937 - 00
Change Title: BCP8X16EUPCI Kit, PCN 104937-00, FYI, Replace D120JCTLSEUROU board with upgraded D120JCTLSUEU2 in the BCP Kit
Date of Publication: March 22, 2005

Type of Change Notification:
FYI - (For Your Information)

Key Characteristics of the Change:
Product Design

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Mar 25, 2005
Date of First Availability of Post-Conversion Material:	Mar 25, 2005

The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

One of the boards that makes up this BCP Kit is the D/120JCT-LS. The revised BCP kit replaces the D120JCTLSEUROU board with D120JCTLSUEU2 board. This new board is required because the QLSLAC device manufacturer has discontinued production of the 5 volt device and a board redesign to accept the new 3.3 volt QLSLAC was necessary. If further details are required reference PCN 104823-00 for the D120JCTLSEUROU change.

Customer Impact of Change and Recommended Action:

Parameter files for the new D120JCTLSUEU2 (universal PCI board used in Europe, Australia, and New Zealand) board are not supported in the following system releases:

- Intel® Dialogic® System Release 5.1.1 Feature Pack 1 Service Update build 45 or **earlier** release on Windows
- Intel® Dialogic® System Release SR_5.1 Feature Pack 2 build 39 or **earlier** release on Linux

Customers who wish to use the new board with any of these system releases can download the parameter files using the link below.

<http://resource.intel.com/telecom/support/tnotes/tnbyos/2000/tn099.htm>

This change has no impact on units in the field.
This change has been thoroughly evaluated to ensure that it does not have any negative functional implications to our customer.
