Customer Impact of Change and Recommended Action:

The label change does not affect the functionality of the product. Customers should be aware of the changes and take any necessary steps to insure no impact for their receiving and processing of the product in their manufacturing. Before and after label mock ups are included for visual reference.

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

Please contact your local Intel Field Sales Rep if you have any further questions about these changes.
