Description of Change to the Customer:

This PCN is for the Intel® NUC Kit DE3815TYKHE and is for information only.

MM# 933135 (a.k.a. DE3815TYKHE) went into production in cell-style packaging, for which the UPC/EAN generated by the tool were 00735858275453 / 5032037059817. As cell-style packaging, that was the only UPC/EAN required to be generated/printed for the 5-pack BLK box. Individualized packaging for this product (wrapped in an outer box) was introduced shortly thereafter, requiring a new pair of UPC/EAN numbers to be generated. The initial UPC/EAN number pair continued to be used on the outside of the 5-pack box for consistency, however the tools automatically assigned the new UPC/EAN number pair to the "outer box" field, giving the impression that the inner and outer box UPC/EAN number pairs were swapped.

This notification is to inform that an Intel web site used to report the UPC/EAN number pairs swapped between the inner and outer boxes from July 2014 through May 2016, and that Intel recently addressed this perceived tool issue. The Intel web site page for this product now shows the correct UPC/EAN number pairs for each box, consistent with that of other NUCs.

There has been no change to the UPC/EAN number pairs printed on the individual and outer box labels, as the printed labels were never impacted.

Customer Impact of Change and Recommended Action:

There is no impact for the customer regarding the actual product and no change to the product itself.
