Change Notification #: 114427 - 00
Change Title: Intel® RealSense™ Camera SR300:
82535IVCHVM,
PCN 114427-00, Product Design,
Firmware upgrade
Date of Publication: March 10, 2016

Key Characteristics of the Change:

Product Design

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Mar 16, 2016
---	--------------

Description of Change to the Customer:

The Intel® CAMERA MOD 82535IVCHVM will undergo the following changes.

- The new Firmware 3.15.0.0 will replace version 3.10.10.0 for :
 - Features update and bug fixes
 - Improved product performance with regards to Win Hello compliance.
 - Wakeup device full implementation
 - Fine tuning of long range filter
 - Change data output to 8 bit dynamic range

Customer Impact of Change and Recommended Action:

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage post-conversion material and update the FW version, when needed, using the FW update tools.

The new firmware have been fully tested, qualified and approved by Intel.
Intel anticipates no impact to customers on the HW side, and full compatibility with system configuration.
However, on the SW side, this FW version is coupled with DCM1.3 and above.

Please contact your local Intel Field Sales representative if you have any further questions about this change.
