

Product Change Notification

103321 - 01

Information in this document is provided in connection with Intel® products. No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document. Except as provided in Intel's Terms and Conditions of Sale for such products, Intel assumes no liability whatsoever, and Intel disclaims any express or implied warranty, relating to sale and/or use of Intel® products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right. Intel® products are not intended for use in medical, life saving, or life sustaining applications. Intel may make changes to specifications and product descriptions at any time, without notice.

Should you have any issues with the timeline or content of this change, please contact the Intel Representative(s) for your geography location listed below. No response from customers will be deemed as acceptance of the change and the change will be implemented pursuant to the key milestones set forth in this attached PCN.

Product Change Notification

Change Notification #: 103321 - 01
Change Title: D865PERL, PCN 103321-01, FFF, Change the revision of 1394 controller, BIOS update
Date of Publication: May 08, 2003

Type of Change Notification:
FFF - (Form-Fit-Function)

Key Characteristics of the Change:
Product Design

Forecasted Key Milestones:

Date of First Availability of Post-Conversion Material:	Jun 03, 2003
--	--------------

The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

1. Replace the Agere* 1394 controller with a later revision and remove resistor R9D19 to support this change. This change is needed to ensure component availability for manufacturing.
2. Add BIOS P07. This BIOS and release notes will be available at <http://developer.intel.com/design/motherbd/> and listed under the D865PERL.

Customer Impact of Change and Recommended Action:

These board changes are not expected to cause a change to the Microsoft* Windows* operating system's software driver stack.

The changes have been thoroughly evaluated to ensure that there is no quality, reliability, or functional implication to our customers. DPSSD is not recommending additional qualification of these changes on platforms received from Intel.

Products Affected / Intel Ordering Codes:

Board Products Table

Affected Product Code	Pre-Change MM#	Post-Change MM#	Pre-Change TA or AA	Post-Change TA or AA
