## Forecasted Key Milestones:

<b>Date of First Availability of Post-Conversion Material:</b>	Jul 14, 2003
--	--------------

*The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.*

## Description of Change to the Customer:

Replace chassis fan control transistors on the S845WD11U server board with P/N A50095-001 at Locations Q1B3, Q7H3 AND Q6J1. This change will provide 1A of current to the fan headers to accommodate chassis fans that have a higher current draw.
