Intel is announcing the discontinuance of the Intel® Server Board S5000VSA.

You have two (2) months to place final orders and two (2) months to take the final delivery.

1. This product discontinuance notification is effective July 13, 2007.

Intel recommends the Intel Server Boards S5000VSASATAR, S5000VSA4DIMMR, S5000VSASCSIR, and S5000VSASASR as replacement products for the current boxed boards, and BSA2BBR, BSA2VBRR, and BSA2SASBBR, respectively, for the current OEM Bulk Pack products.

Please contact your local Intel Sales Office or Distributor if you require more information or need assistance in selecting a replacement product.

Customer Impact of Change and Recommended Action:

To support the upcoming release of 45nm Intel(R) Xeon(R) Processors and to ease customer transition to this new generation of processors, Intel will be "refreshing" (new product codes and new MM#'s) all its current products based on the Intel(R)5000 Series MCH.

Besides the VR/Vtt changes to support the new processors the entire software stack (BIOS, BMC, FRU/SDR) will change. The Closed Loop Thermal Throttling (CLTT) feature is also being added to all the Refresh Products. Customers are highly recommended to upgrade their SW stack to the latest released versions although the new hardware will be "backwards compatible" for maintenance and older processor support.

Note: Customers are reminded to place their final orders with Intel for the affected products latest by October 05, 2007. Final delivery of product must also be completed no later than November 09, 2007.
