PCN 114061-00, Product Design, BIOS Update and capacitor addition.**  
**Date of Publication:** **September 09, 2015**

## Key Characteristics of the Change:

Product Design

## Forecasted Key Milestones:

<b>Date Customer Must be Ready to Receive Post-Conversion Material:</b>	Sep 25, 2015
---	--------------

## Description of Change to the Customer:

The Intel® NUC Kit SKUs listed in the products affected table below will have the following changes.

The BIOS will be updated from RYBDWI35.86A.0130 to RYBDWI35.86A.0350. To access the release notes or get a copy of the BIOS for evaluation, go to <http://downloadcenter.intel.com>.

To enhance the design two 0.1uF capacitors will be added to the power sense circuit.

## Customer Impact of Change and Recommended Action:

It is recommended that customers evaluate this new BIOS to ensure a smooth transition. Intel validation of a new board revision does not include testing with older versions of BIOS. This change is not expected to cause a change to the Microsoft Windows\* operating system's software driver stack.

These changes have been evaluated to ensure that there are no quality, reliability or functional implications to our customers. Intel is not recommending additional qualification of these changes on platforms received from Intel.

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

Milestone dates are estimates and subject to change based on business and operational conditions.
