

Product Change Notification

107363 - 00

Information in this document is provided in connection with Intel products. No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document. Except as provided in Intel's Terms and Conditions of Sale for such products, Intel assumes no liability whatsoever, and Intel disclaims any express or implied warranty, relating to sale and/or use of Intel products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right. Intel products are not intended for use in medical, life saving, or life sustaining applications. Intel may make changes to specifications and product descriptions at any time, without notice.

Should you have any issues with the timeline or content of this change, please contact the Intel Representative(s) for your geographic location listed below. No response from customers will be deemed as acceptance of the change and the change will be implemented pursuant to the key milestones set forth in this attached PCN.

Product Change Notification

Change Notification #: 107363 - 00

**Change Title: Intel® PRO/Wireless 3945ABG Network Connection
WB Skus: WM3945AGM1WB, M2WB, RWWB,
JPWB (MM#s 878722, 878721, 878749, 878738),
PCN 107363-00, Label, OUI Replenishment, Change
MOW1 Regulatory Markings**

Date of Publication: March 06, 2007

Key Characteristics of the Change:

Label

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	Mar 30, 2007
Date of First Availability of Post-Conversion Material:	Mar 30, 2007

The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

The following changes will be implemented during this ECO cycle:

1. Intel has depleted the available 3945ABG MAC addresses in the current OUI block. Allocation of MAC addresses in OUI 00-19-D2 will be exhausted by the end of WW14 (4/6/07). The change is required to continue to provide 3945ABG supply to Intel's customers. All Intel® PRO/Wireless 3945ABG Network Connection skus will be updated with the new OUI numbers.

Description of change:

Pre-Conversion: 00-19-D2

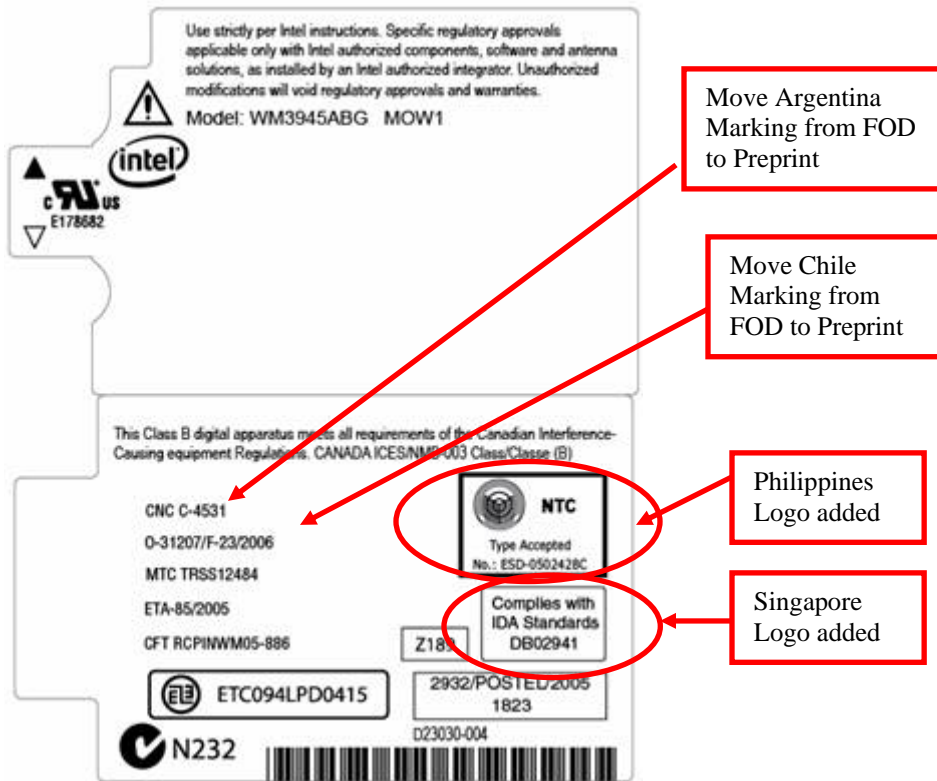

Post-Conversion: 00-1B-77

2. Regulatory marking changes on the M1WB product label
 - Add Regulatory Markings for Philippines and Singapore
 - Move the Chile and Argentina regulatory markings from FOD print to Pre-print label.

Customer Impact of Change and Recommended Action:

Customer will receive product with the following changes:

1. New MAC addresses with a change in the first 6 characters.
Pre-Conversion: 00-19-D2
Post-Conversion: 00-1B-77
2. Regulatory marking changes for M1WB product label
New M1WB

3. Dash to the TA#

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.

For your information only. No change to form fit or function. No change to Intel Ordering codes.

Milestone dates are estimates and subject to change based on business and operational conditions.
