# Product Change Notification

**Change Notification #:** 107592 - 00  
**Change Title:** Intel® Carrier Grade Server TIGPR2U, PCN 107592-00, Product Material, Change of Flash Memory Chip on the FPIO  
**Date of Publication:** May 25, 2007

## Key Characteristics of the Change:

Product Material

## Forecasted Key Milestones:

<b>Date Customer Must be Ready to Receive Post-Conversion Material:</b>	Jun 25, 2007
---	--------------

## Description of Change to the Customer:

The Micron flash memory chip on the FPIO board of the Intel® Carrier Grade Server TIGPR2U will be replaced with a STMicro flash memory chip due to the EOL of the former. The updated FPIO board with the STMicro chip will come with firmware version 1.06 and a new boot block.

## Customer Impact of Change and Recommended Action:

Customers should note that they should not flash the FPIO board with the STMicro chip back to firmware version 1.05, since this version of the firmware is not compatible with the STMicro chip. However, if a customer inadvertently does this, the FPIO board is still functional and the customer will have no problem in flashing back to firmware version 1.06.

The new FPIO board has been validated and no operational or functional issues were identified.
