

Product Change Notification

Change Notification #: 119461-00

Change Title: Select Intel® Ethernet Network Adapters,
PCN 119461-00, Product Design, Product Marking,
Label,
Second Source Supplier & Label Changes

Date of Publication: March 03, 2023

Key Characteristics of the Change:

Product Design, Product Marking, Label

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material	April 17, 2023
--	----------------

Description of Change to the Customer:

The Intel® Ethernet Adapter SKUs listed in the “Products Affected / Intel Ordering Codes” table will have the following changes:

1. Intel® Ethernet Controller X710-AT2 and Intel® Ethernet Controller X710-TM4 products will now have dual source substrate suppliers. To ensure continued production and uninterrupted supply of these Controllers, Intel has qualified another substrate supplier. There will be no functional change to the Ethernet controllers. The controllers with newly qualified substrate supplier will be marked differently, with an “I” added to end of current marking.

Controller	Current Supplier	New Supplier
Intel® Ethernet Controller X710-AT2	EZX710AT2	EZX710AT2I
Intel® Ethernet Controller X710-TM4	EZX710TM4	EZX710TM4I

2. To reflect that the products may use controllers from each substrate supplier, the following label changes will be made:

- Intel will update the Intel Serial Number label to change the Intel PBA number to reflect the “Post Change PBA” part number, as documented in the “Products Affected / Intel Ordering Codes” section.
- Intel will update all the Intel outer box/disti labels on packaging to change the Intel Top Assembly number to reflect the new “Post Change TA” part number, as documented in the “Products Affected / Intel Ordering Codes” section.

Customer Impact of Change and Recommended Action:

Intel considers this change a Minor Change and anticipates no impact to customers. The additional source has been certified and passed the Intel qualification process. Qualification results confirm no change to product quality/reliability/functionality.

The Intel® Ethernet Adapter SKUs listed in the products “Products Affected / Intel Ordering Codes” will use controllers from either the current or new substrate supplier.

Mixing of substrate materials between suppliers will be allowed as there is no difference in the functionality visual appearance (except the marking) or quality of the additional supplier.

Please contact your local Intel representative with any questions concerning the changes announced in this Product Change Notification.

Notices & Disclaimers

No license (express or implied, by estoppel or otherwise) to any intellectual property rights is granted by this document.

Intel disclaims all express and implied warranties, including without limitation, the implied warranties of merchantability, fitness for a particular purpose, and non-infringement, as well as any warranty arising from course of performance, course of dealing, or usage in trade, except as provided in a separate written agreement.

You may not use or facilitate the use of this document in connection with any infringement or other legal analysis concerning Intel products described herein. You agree to grant Intel a non-exclusive, royalty-free license to any patent claim thereafter drafted which includes the subject matter disclosed herein.

The products described may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Statements in this document that refer to future plans or expectations are forward-looking statements. These statements are based on current expectations and involve many risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such statements. For more information on the factors that could cause actual results to differ materially, see our most recent earnings release and SEC filings at www.intc.com.

Customer is responsible for safety of the overall system, including compliance with applicable safety-related requirements or standards.

Intel technologies may require enabled hardware, software or service activation.

No product or component can be absolutely secure.

Your costs and results may vary.
