## Description of Change to the Customer:

The Intel® vRAN Accelerator ACC100 Adapter SKUs listed herein will undergo the following changes:

- These products will move from using Intel® 99AD92 Double PERST SoC to using the Intel® 99AN5A Single PERST SoC. The 99AD92 SoC PCIe initialization requires host double Platform Reset; otherwise, a PCIe enumeration failure may result. The 99AN5A SoC PCIe initialization only requires a host single Platform Reset.

As a result of this change, the PBA (printed board assembly) and TA (top assembly) numbers will roll as noted in the affected products table within this PCN notice. If the PBA/TA numbers are printed on any product or box labels, those will show the PBA/TA dash roll as well.

## Customer Impact of Change and Recommended Action:

Intel anticipates no impact to customers. The new Intel® vRAN Accelerator ACC100 Adapter SKUs have been fully tested, qualified, and approved by Intel. Customers can expect to receive mixed inventory until current inventory levels are depleted.

Please contact your local Intel Field Sales Rep if you have any further questions about these changes.
