Product Change Notification

Change Notification #: 112983 - 00
Change Title: Update 750W Common Redundant Power Supply FXX750PCRPS Firmware PCN 112983-00, Product Design Update Firmware
Date of Publication: April 23, 2014

Key Characteristics of the Change:

Product Design

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material *:	Effective immediately
---	-----------------------

** Intel appreciates the customer's desire to receive the latest revision of products. However, Intel manages inventory on a first in first out (FIFO) basis at the MM# level. Subsequently, customer requests for a specific revision of material (below the MM#) will not be supported by Intel.*

Description of Change to the Customer:

Intel is implementing the following change on the 750W Common Redundant Power Supply FXX750PCRPS:

- The power supply firmware has been updated to revision v100. This update prevents a power race condition from occurring during an AC power loss event when the power supply is in cold redundancy mode. The part number of the power supply has been updated from E98791-009 to E98791-010.

The new power supply firmware v100 has also been incorporated into system BMC firmware revision 01.20.5793, which automatically updates the power supply to the latest revision when a full system software update is performed using a System Update Package (SUP).

Please reference Technical Advisory TA-1050-2 for more information.

Customer Impact of Change and Recommended Action:

This change has been effective since April 4th, 2014 and based on inventory levels customers will start seeing this change now.

Intel recommends that the customer perform a standard level of evaluation. Customers can download and evaluate the latest software package at <http://www.intel.com/support>.
