Thunderbolt™ Share

Do more with two PCs

Easy

Thunderbolt™ Share makes it easier than ever to connect two PCs; all you need is a Thunderbolt™ port and cable.

Fast

Thunderbolt™ Share takes advantage of Thunderbolt™ 4 or Thunderbolt™ 5 high-bandwidth and low-latency for extraordinary performance.

Efficient

Two PCs can be better than one. Connecting two PCs with Thunderbolt™ Share helps improve your multitasking and productivity.

Fast PC-to-PC access for sharing screen/monitor, keyboard, mouse, and storage

Sync folders or drag-and-drop files between PCs with the speed of Thunderbolt™

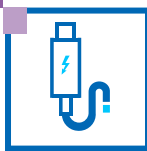

Quickly transfer data and files from an old computer to a new computer

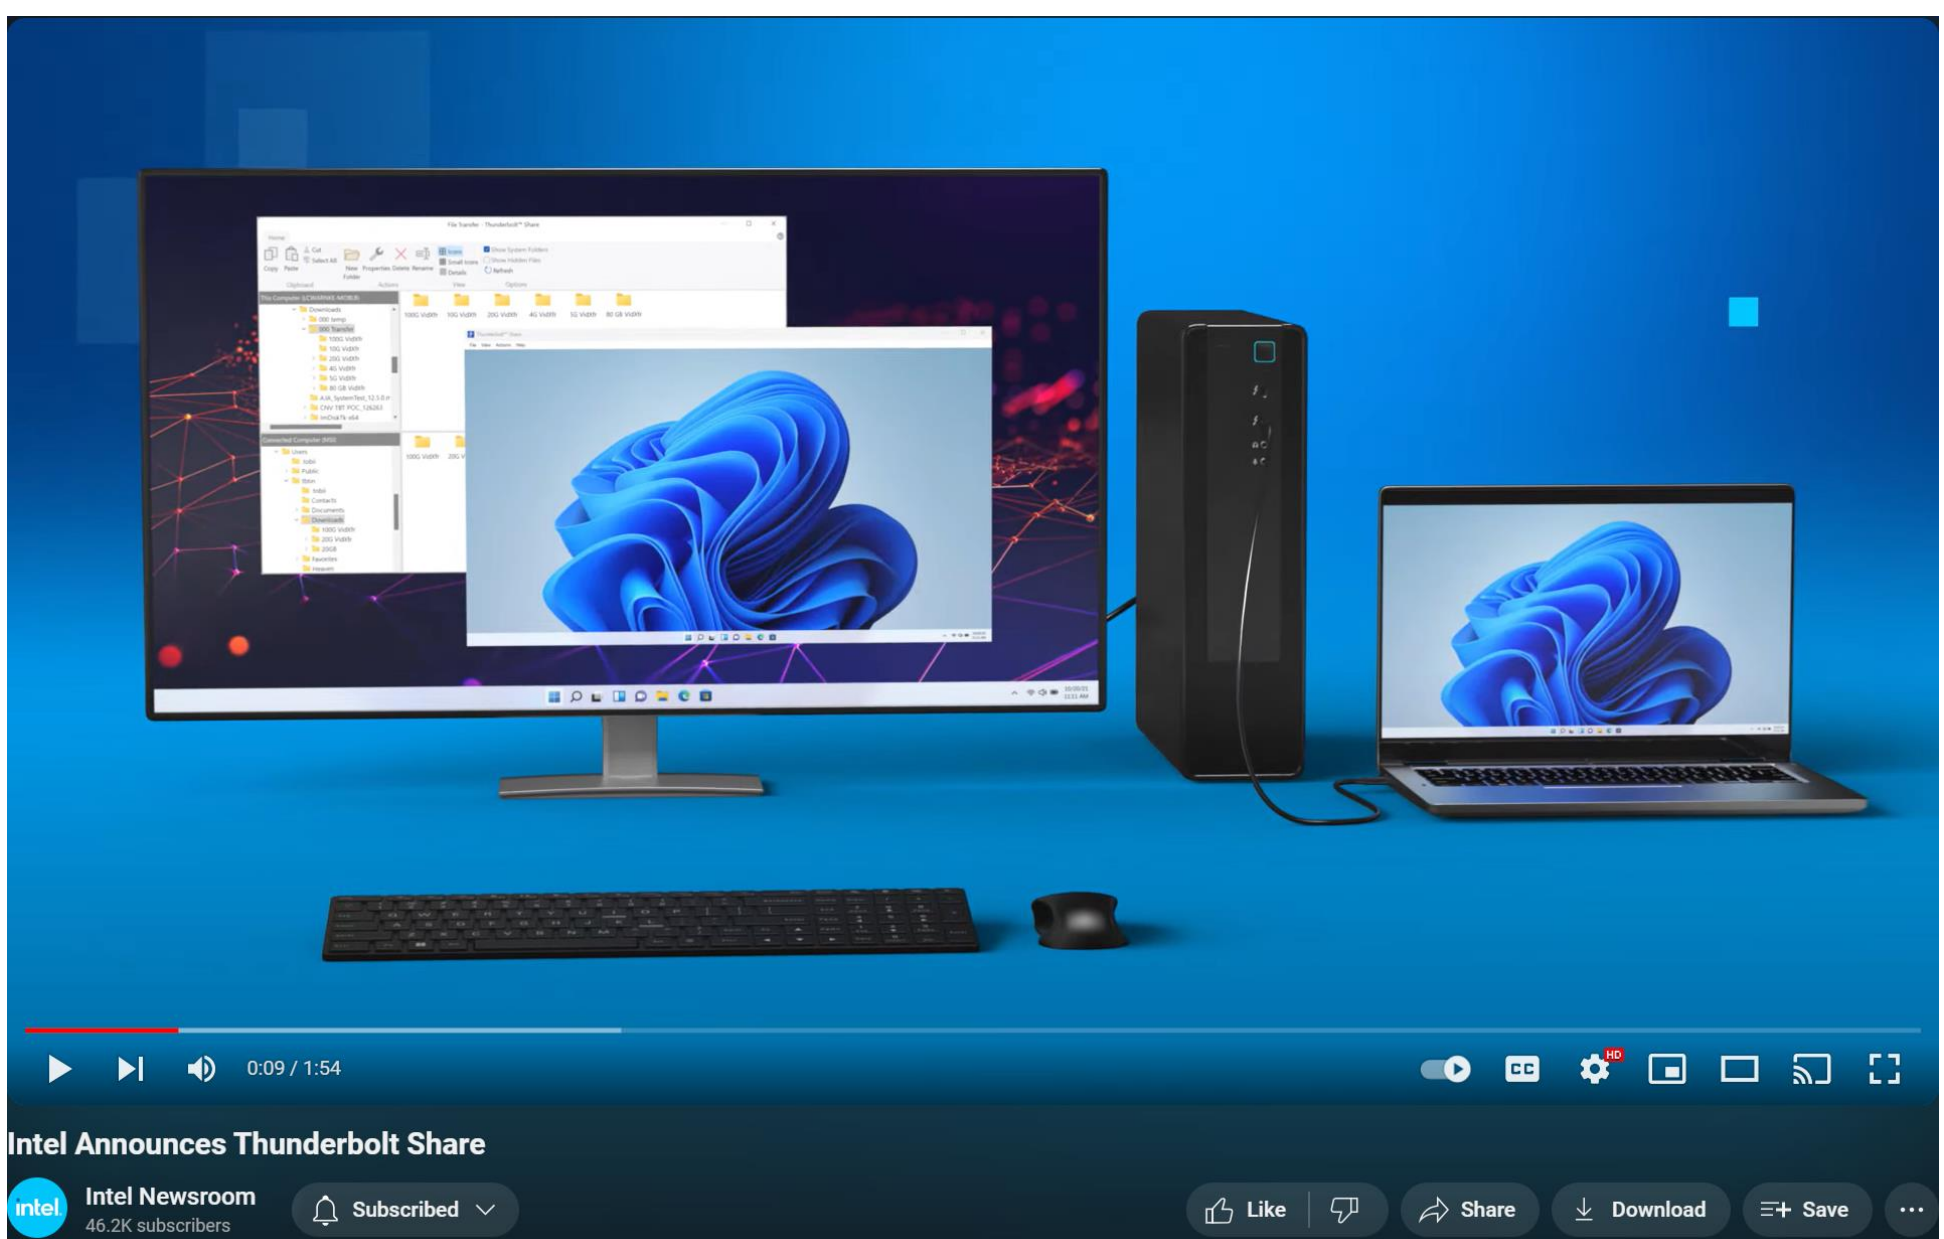

Super fast connection with high bandwidth and ultra-low latency

Hardware based Thunderbolt™ security

Offered with select new Thunderbolt™ PCs and accessories, and works with all Thunderbolt™ 4 or Thunderbolt™ 5 products on Windows® OS

Powered by Thunderbolt™

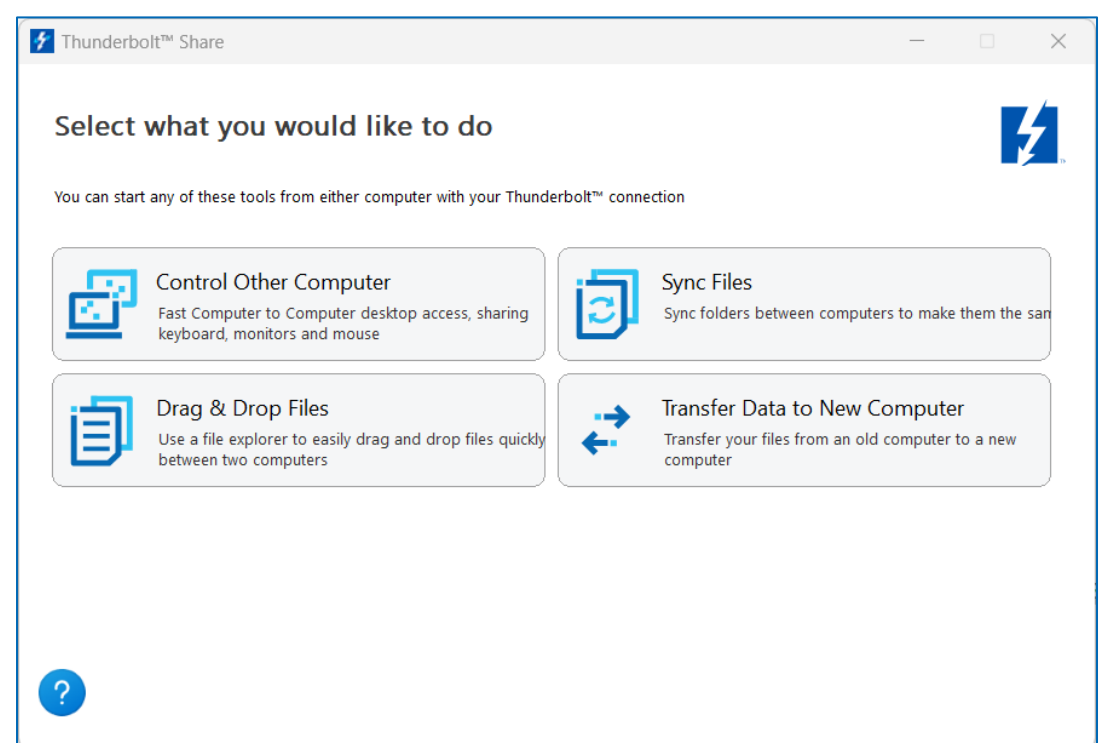

Thunderbolt™ offers a best-in-class set of product capabilities to deliver the simplest, most reliable, and fastest cable solution available for connecting a PC to displays, your favorite accessories, PC charging, and with Thunderbolt Share™, connecting to a second PC. Thunderbolt™ Share takes advantage of the industry-leading performance of Thunderbolt™ to deliver extraordinary bandwidth and low latency for a responsive and seamless experience.

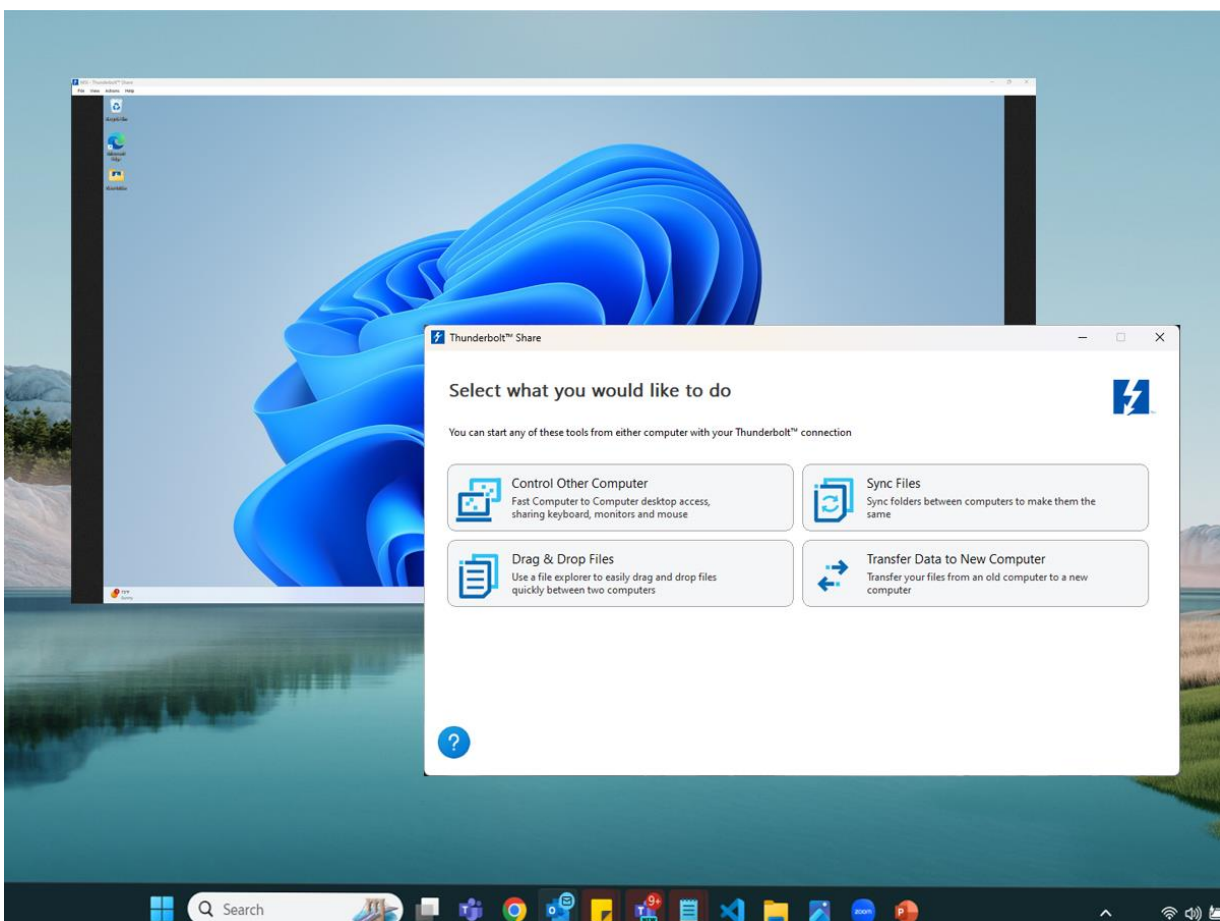

Thunderbolt™ Share

New Multi-PC Experiences

[Thunderbolt™ Share](#) unlocks ultra-fast PC-to-PC connectivity experiences that fundamentally change the way users interact with two PCs. With an intuitive, easy-to-use interface, Thunderbolt Share simplifies multitasking, enhances productivity, and unlocks new ways to work seamlessly between computers.

Screen Share Seamlessly

Thunderbolt™ Share empowers users to control one PC from another—no complex setup required. With ultra-fast connectivity and low latency, it delivers smooth, high-resolution screen sharing whether you're working in office apps or editing in your favorite creative tools. Gamers and streamers will also appreciate the high frame rates, any resolution, and support for audio sharing.

Drag & Drop

Accessing files between two PCs couldn't be more efficient. Simply drag and drop files and folders all at the speed of Thunderbolt™.

Common commands are also available, such as "copy", "paste", and "cut" for files across both of their systems.

Upgrade Fast

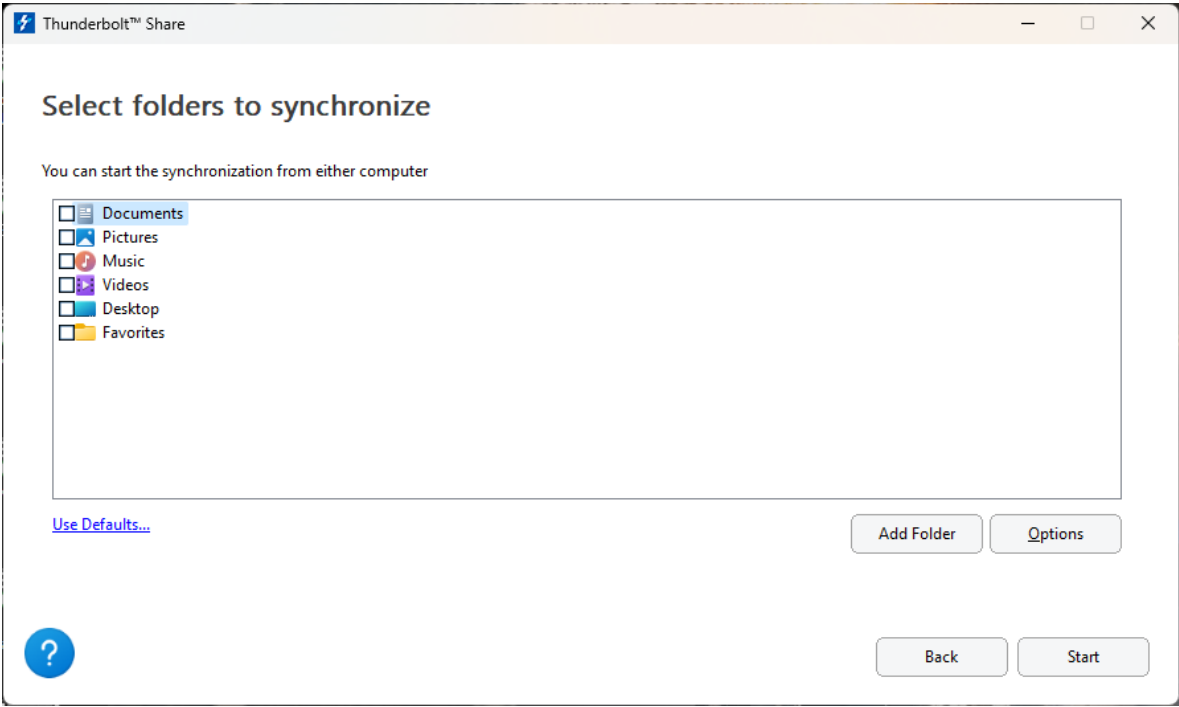

Transferring data from an old computer to a new computer has never been easier than with Thunderbolt™ Share. Users can quickly migrate their files and folders from one computer at Thunderbolt speeds in a matter of minutes rather than hours.

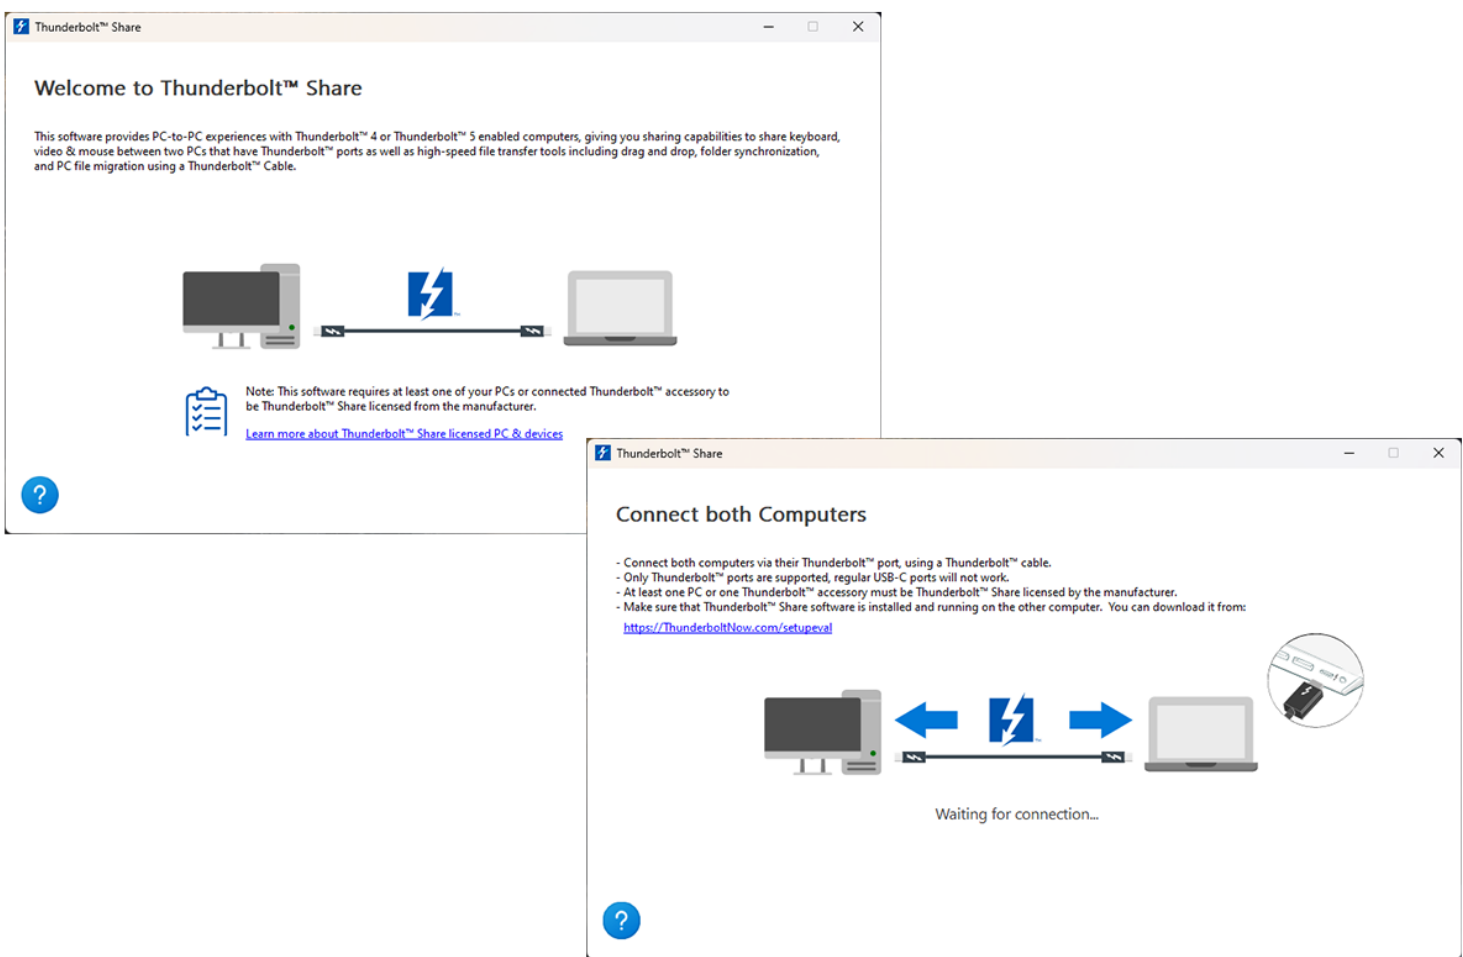

Synchronize Files & Folders Effortlessly

Thunderbolt™ Share gives users the power to effortlessly synchronize files and folders across two PCs.

Back-up your personal files, gaming libraries or improve workflows while working on large creative projects.

Easy Setup

Step 1: Purchase a PC or accessory licensed for Thunderbolt™ Share

Step 2: Download the Thunderbolt™ Share software

Step 3: Start sharing

Flexible Configurations

Thunderbolt™ Share takes advantage of the flexible configurations offered by Thunderbolt™ technology. Easily connect two Thunderbolt™-enabled PCs directly with a Thunderbolt™ cable or with a Thunderbolt™ accessory.

- Directly between two Thunderbolt™ enabled PCs
- Via a Thunderbolt™ dock
- Via a Thunderbolt™ monitor

Requirements:

PC Requirements: Any Thunderbolt™ 4 or Thunderbolt™ 5 enabled PC running Windows® 11 OS or newer

Thunderbolt Accessory (optional): Any Thunderbolt 4 or Thunderbolt 5 accessory such as a dock, monitor, or storage

At least one PC or Thunderbolt Accessory must be Thunderbolt™ Share licensed by the manufacturer. Look for Thunderbolt™ Share as a listed PC or accessory feature.

Find Thunderbolt Share Licensed Products

With just one Thunderbolt™ Share licensed PC or accessory, you can instantly connect and collaborate across PCs—no complex setup required.
