

“WriteUp empowers users to rewrite content based on their preferences, something no other tool can do.”

CEO, Upstage ai

Writeup

Writeup is an on-device AI writing assistant for Windows PCs powered by the Solar large language model (LLM) from Upstage AI. Leveraging Intel® Core™ Ultra processors with dedicated graphics processing units (GPU), Writeup processes data locally, ensuring privacy, reducing latency, and cutting the need for cloud connectivity, lowering operational expenses. The app offers tools for writing tasks with options like tone adjustment, length control, emoji usage, and language settings. Partnering with Intel, Writeup delivers a connected AI experience, ensuring advanced AI tools are accessible on Windows PCs while maintaining high privacy and performance standards.

accelerated by **intel.**

AI assisted writing application running on local AI engine (GPU)

Key Features			
Enhanced Privacy & Security	Tailored AI Writing Support	Local Processing	Memory & Speed Optimized

Vertical Markets:

- Retail
- Education
- Energy
- Medical
- Manufacturing
- Finance

Use Case:

- Logistics & Tracking
- Asset & Operations Optimization
