

Product Change Notification

Change Notification #: 919386-00

Change Title: Select Intel® Ethernet Network Adapter OCP 3.0 E610-products

Change Detail: Updates to: UKCA Address, China RoHS QR Code, South Korea Logo on Clamshell, LKV1.5 NVM & E610-IT4 Branding String

Date of Publication: May 13, 2026

Key Characteristics of the Change:

Product Design, Product Marking, Label

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material	June 29, 2026
--	---------------

Description of Change to the Customer:

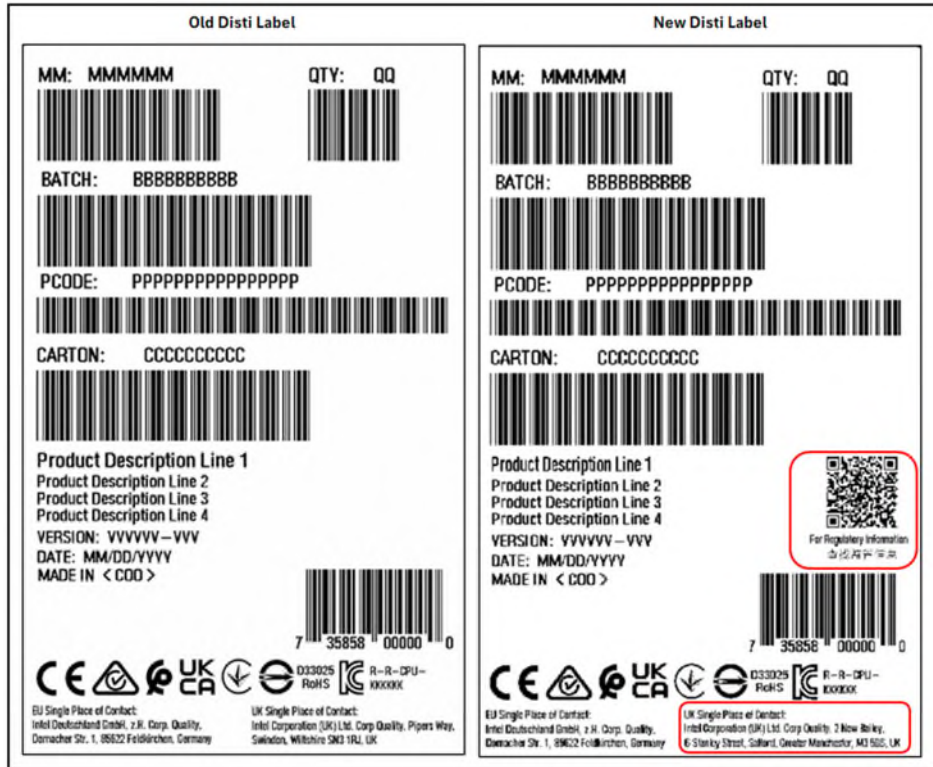

The Intel® SKUs listed in the product affected table below will be updated with the following six change(s):

1. As communicated in PCN 859226-00 published in July'2025, Intel is relocating its UKCA Single Place of Contact (SPOC) address by the end of September 2025. As a result, all product labels must reflect the new address starting October 1, 2025. This update applies to all products listed in the Products Affected/Intel Ordering Codes table. The new address is provided below:

UK Single Place of Contact:

Intel Corporation (UK) Ltd., Attn: Corp. Quality, 2 New Bailey,
6 Stanley Street, Salford, Greater Manchester, M3 5GS, United Kingdom

Additionally, as communicated in same PCN 859226-00, due to recent amendments made to GB/T 26572-2011 (better known as China RoHS), Intel will replace the China RoHS flyer in Ethernet Network Adapter shipments with a QR code on the outer box label, linking to the product's regulatory site. This change supports compliance with China's updated RoHS regulation, effective January 2026, which adds four phthalates to the list of restricted substances, aligning it with EU RoHS. Customers can access the updated substance list and disclosure table via the QR code. Image of the label before/after the QR code are shown below:

(Picture is for example only, to show the new address and to demonstrate the QR and location placement on the Bulk Pack labels; the actual placement is subject to change per different label template).

2. To meet the October 1, 2025 deadline for updating the UKCA SPOC address, Intel will apply an additional label with the new address and a QR code over the existing EU and UKCA SPOC addresses on older inventory where needed. This ensures all shipped products after October 1, 2025 reflect the updated information. The relabeled inventory will remain at their respective TA revision without TA dash roll.

- As communicated in PCN 874317-00, permanent update to the South Korean recycling symbol on clamshell packaging. The new clamshell design is shown below. Once existing clamshell inventory K24628-002 is depleted, new clamshell packaging K24628-003 will be introduced.

- Update the Intel VPD branding string to include “Intel®” for the Intel® Ethernet Network Adapter OCP 3.0 E610-IT4.

Pre-ECO Branding String

ETHERNET FLASH DECODER - PC_DELL_WEBSTER_FLAT_OP_MIP23_NVM_4PH_SCP_2P5G_FW_7P9P15_NCSIWPLDMOMCTP_0.03_8000C0E4_STRIPPED

- Intel will update the NVM (Non-Volatile Memory) image being programmed onto these cards from LKV 1.01 to the latest NVM V1.5 for the OCP 3.0 adapters.
 - V1.5 has several added features: <https://www.intel.com/content/www/us/en/secure/content-details/743367/view-details.html>
 - Customers who wish to update their older boards to the new NVM V1.5 can access the NVM update package here: <https://www.intel.com/content/www/us/en/download/845347/non-volatile-memory-nvm-update-package-for-intel-ethernet-e610-series.html>
- Intel will remove the anti-counterfeit label from adapters that incorporate SPDM (Security Protocol and Data Model) functionality. All applicable security and authentication requirements will continue to be fully met through the integrated SPDM capability.

Customer Impact of Change and Recommended Action:

Intel anticipates no impact to customers.

Customers can expect to receive mixed inventory until current inventory levels are depleted.

Please contact your local Intel Field Sales Representative if you have any further questions about these changes.
